

## Definition Text Structure

Signal Words: \_\_\_\_\_

Provided Text:

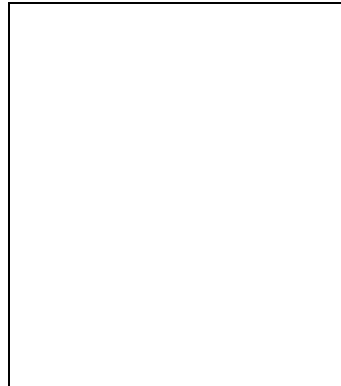

**The Ocelot**  
Ocelots live in the grasslands and rainforests of South America. They are tan, medium-sized cats averaging two to three feet in length. Their long tails have black stripes. These fascinating cats are very quick hunters and prey upon small animals, such as monkeys, as well as fish, birds, and even snakes! They can climb trees and can even swim! If you want to see one, you'd better stay up late. These fierce predators are nocturnal animals.
