

Reading Library  
For Student Use  
(and additional resources)

Use these references to create a reading center for further body systems exploration. Books from the reading center can be used during read-aloud time, during selected reading time, or checked out and taken home for sharing with parents. Although these references are not required for use in this unit, the addition of these books will peak student interest and the self-motivation to read in the content area is enhanced. This is not an exclusive list, but contains examples of books that can be used. To find books available from schools in your area, use Sunlink at [www.sunlink.ucf.edu](http://www.sunlink.ucf.edu). This site allow for a search for books and other media from all Florida schools. This list was created from books available from various schools in Bay District School.
