

Nine Around the Sun Review for the Assessment

1. List the nine planets in order starting with the one closest to the sun and moving outwards.	Sun ↓
2. Write the word “big” beside the name of the largest planet.	
3. Draw moons around the planet with the most moons.	
4. Write the word “cold” beside the name of the coldest planet.	
5. Draw rings around the planet with the most rings.	
6. Write the word “pull” beside the name of the two planets that have a stronger known gravitational pull than the Earth.	
7. Write the word “twin” beside the name of the two planets that are almost alike in size, temperature, and rotation time.	
8. Write the word “slow” beside the planet that takes the longest to revolve around the sun.	

9. Turn your paper over and write what you know about these two words: gravity, orbit
