

First Steps

**Are You Thirsty? Have a cup of Kool-Aid!
But remember:**

You must make the cup.

You will use a plain piece of paper.

You must follow directions.

You may NOT get help from a friend.

I will be sitting on the stool in the corner.

Come to me if you need help with a word.

Directions for making a cup are on the back counter.

The paper to use is on the chair at the front of the class.

Go get a set of directions. Lay it on your desk.

Go get the paper you will need. Sit at your desk.

Read all the directions. Read carefully.

Do what each step tells you.

Bring the cup to me.

I will check it by pouring Kool-Aid in it.

If you did not follow directions you will have to make another one.

You cannot have Kool-Aid until the cup is made right.

If it does not leak, you may drink the Kool-Aid.

Read each step. Do what it says. Use a square of paper. Make a cup. The test will be to see if it holds Kool-Aid. It must not leak.

DIRECTIONS FOR KOOL CUPS

1. Fold the square to make a triangle. (Figure 1)

2. On the right, fold along the dotted line. (Fig. 2) Fold the point in to the triangle. Make the point touch the opposite side. (Figure 3) Shapes within this shape are: a triangle at the top, a big triangle at the bottom, and a triangle in the middle.

3. Flip the shape horizontally. (Figure 4) Do Step 2 again. (Fig. 5) Shapes within the shape are: a triangle at the top, a small triangle on the bottom, and a triangle in the middle.

4. Fold down one flap of the top triangle. Fold it into the open part of the middle triangle. (Figure 6)

5. Flip the cup over.
6. Fold the last flap of the top triangle. Fold it into the open part of the middle triangle. (Figure 7)
7. Open the cup.
8. Bring your cup to me. We will test it with Kool-Aid.
