# Science Center

Living things have offspring that resemble their parents.

1. Cut out 4 pictures of animals from the magazines.
2. Fold your drawing paper into four sections. (Make one hamburger fold. Open your paper and make one hotdog fold. Open your paper up. You should have four equal sections!)
3. Paste a picture into each square of your drawing paper.
4. Draw a picture of what you think your animal's offspring would look like. If you cut out a baby animal, draw what that baby's parent would look like.
