## Let's Go Shopping!!!

(Part 2)

1. List the items that you have decided you can purchase without going over budget. Think about what items you would like to put with what discount.
2. Find the discount in decimal form and write in the third column.
3. Multiply the decimal times the original amount.
4. Write the product of the discount and the original in the dollar amount of discount column.

| ITEM<br>(A) | DISCOUNT      |  | DISCOUNT IN<br>DECIMAL<br>FORM | X | ORIGINAL<br>AMOUNT<br>(B) | = | DOLLAR<br>AMOUNT OF<br>DISCOUNT<br>(C) |
|-------------|---------------|--|--------------------------------|---|---------------------------|---|--|
| 1.          | Save 33%      |  |                                | X |                           | = |  |
| 2.          | 1/3 off       |  |                                | X |                           | = |  |
| 3.          | 10% off       |  |                                | X |                           | = |  |
| 4.          | 25% off       |  |                                | X |                           | = |  |
| 5.          | ¼ off         |  |                                | X |                           | = |  |
| 6.          | Save 75%      |  |                                | X |                           | = |  |
| 7.          | Take 25% off  |  |                                | X |                           | = |  |
| 8.          | Take \$10 off |  |                                | X |                           | = |  |
| 9.          | Save 15%      |  |                                | X |                           | = |  |
| 10.         | Take 50% off  |  |                                | X |                           | = |  |

**Let's Go Shopping!!!**

(Part 3)

1. List the original price of the items that you selected in part 2 column B. Decide what items you would like to put with each discount.
2. Find the discount in decimal form and write in the third column.
3. Multiply the decimal times the original amount.
4. Write the product of the discount and the original in the dollar amount of discount column.

| ITEM BY# (A) | ORIGINAL AMOUNT (B) | - | DOLLAR AMOUNT OF DISCOUNT (C) | = | DISCOUNTED AMOUNT (D) | TAX X 7.5% | = | TAX IN \$ | + | DISCOUNT AMOUNT (D) | = | FINAL PRICE |
|--------------|---------------------|---|-------------------------------|---|-----------------------|------------|---|-----------|---|---------------------|---|-------------|
| 1.           |                     | - |                               | = |                       |            | = |           |   |                     |   |             |
| 2.           |                     | - |                               | X |                       |            | = |           |   |                     |   |             |
| 3.           |                     |   |                               | X |                       |            | = |           |   |                     |   |             |
| 4.           |                     |   |                               | X |                       |            | = |           |   |                     |   |             |
| 5.           |                     |   |                               | X |                       |            | = |           |   |                     |   |             |
| 6.           |                     |   |                               | X |                       |            | = |           |   |                     |   |             |
