

## **RUBRIC FOR THE ASSESSMENT OF ELECTRICITY GENERATION**

**3 POINTS – Draws a neat and accurate diagram that includes the three essential elements necessary for the production of electric currents; a coil of wire, a magnetic field, and some form of mechanical energy. Also included is an accurate description of how the electrical current is produced.**

**2 POINTS – Draws an accurate diagram that includes the three essential elements necessary for the production of electric currents, and includes a description of how electric currents are produced.**

**1 POINT – Draws a diagram that includes some of the two of the three elements necessary for the production of electric currents, and includes a description of the diagram.**

**0 POINTS – Draws a diagram that is not accurate and does not turn a description**
