Sample Class Chart for "Do You See What I See?"

The following chart may be created on the board or chart paper. It should be large enough to hold students' sticky note responses to the question, "What is under each microscope?"

Microscope	Student Responses
1	□
2	□ □
3	□
4	□

After all students have observed the products and made their guesses, the teacher should be ready to lead the students to organize the results by grouping the data by product (see Session Two, step #3). A sample class chart of twelve students' responses organized by product is seen below:

Microscope	Student Responses
1	salt, salt, salt, sand, sand, sand, sand, sand, sand, sand, sugar, sugar
2	salt, salt, sand, sand, sugar, sugar, sugar, sugar, sugar, sugar, sugar, sugar
3	salt, salt, salt, salt, salt, salt, sand, sand, sugar, sugar, pepper, pepper
4	salt, sand, sand, sand, sugar, pepper, pepper, pepper, pepper, pepper, pepper, pepper
